

Technical Data Sheet

eimü® Doubel-Film-Dip

Product description

eimü® Doubel-Film-Dip is a ready-to-use, film-forming teat disinfectant and care product for dipping application.

Product information

eimü® Doubel-Film-Dip is a highly effective, fast-acting disinfectant based on 3,000 ppm surfactant iodine with proven effectiveness in accordance with DIN-EN standard 1276 with the approval number N-30558.

eimü® Doubel-Film-Dip provides intensive care through the addition of sorbitol and allantoin, and keeps the teat skin healthy and supple.

eimü® Doubel-Film-Dip leaves a protective barrier film behind and remains clearly visible.

Directions for use

After milking, the teats must be immersed in the undiluted solution immediately after removing the milking equipment. Make sure that the entire teat surface is sufficiently wetted.

Always use undiluted and use a dip cup with non-return valve.

Always fill the dip cup only with the amount required for one milking time.

Dip cups after use or clean before filling the tank.

Store in a cool and frost-protected place at + 5 to 25° C.

Do not return used solution in the original container.

Article information
